KAASHI MAGIC DIGITS

50–55 PRODUCT LAUNCH CATALOGUE PLAN

Working Master Plan • Initial Product Selection

1. Purpose of This Plan

This document converts the competitor product audit into a practical initial catalogue plan for Kaashi Magic Digits (KMD). The objective is to launch with approximately 50–55 SKUs covering crystals, bracelets, Rudraksh, charging/energy plates, Yantra/Vastu products, spiritual décor and KMD-specific combinations.

This is a proposed planning document, not a final purchase order. Products should be finalized after checking supplier availability, quality, landed cost, margins, packaging and KMD branding.

2. Catalogue Strategy

- Keep the initial catalogue broad enough to look like a complete spiritual-wellness store.
- Use high-demand, easy-to-explain products as the core range.
- Use Rudraksh and selected products for Numerology/Moolank-based personalization.
- Keep premium or high-ticket items limited and preferably order-based at launch.
- Create KMD-exclusive kits/combos so the catalogue is not only a copy of competitor listings.
- Use Aura Scanning + Numerology consultation as the service layer that can recommend products.

3. Proposed 55-SKU Category Mix

Category	Planned SKUs
Crystal Tumbles	12
Crystal Bracelets	10
Rudraksh	10
Selenite / Energy Plates	5
Yantra / Vastu / Spiritual	7
Crystal / Spiritual Décor	5
KMD Special Combos	6
TOTAL	55

4. KMD 55-Product Master Plan

Vastu Pyrite Tortoise	INR 799	#953
7 Chakra Harmony Kit	INR 1,699	#955
Abundance Kit	INR 799	#956

6. Initial Buying Rules

- BUY NOW: Core products that should form the visible catalogue from launch.
- BUY LIMITED: Keep lower opening quantities until actual sales demand is known.
- PREMIUM / ON ORDER: Avoid heavy inventory; procure after customer order or consultation where practical.
- KMD EXCLUSIVE: Build these around Numerology/personalization so they become differentiated offerings.
- For Rudraksh, authenticity, origin, bead quality and certification/verification should be checked before listing.
- Do not use competitor prices as final KMD prices. Final pricing should be based on landed cost, packaging, payment fees, shipping, marketing cost and target margin.

7. Recommended Next Phase

1. Freeze the exact 50–55 SKUs after supplier availability and quality checks.
2. Create a supplier purchase sheet with quantity, wholesale cost, MOQ and expected landed cost.
3. Separate products into Essential Stock / Limited Stock / Order Based.
4. Create KMD product names, descriptions, images and packaging labels.
5. Create selling prices and introductory offers only after landed cost is available.
6. Build the website catalogue category-wise and connect relevant products to Numerology/Aura Scanning consultations.

8. Source & Scope Note

Primary source for competitor references: RudraManni_Private_Competitor_Product_Audit.pdf supplied for this project. The audit contains 1,023 product references across multiple categories. PDF row numbers cited above refer to the product-reference numbering in that audit.

Where this plan says 'KMD proposed product', the item is a catalogue/branding proposal rather than a claim that the exact product was found in the audit. Where an exact PDF row was not captured in the working extract, the plan does not invent a price.
